Company Policy Regarding Conflict Minerals

Sunstone Circuits, LLC is committed to responsible sourcing of minerals and complies with the regulations of the US Dodd-Frank Act, including Section 1502 and the Securities and Exchange Commission's Conflict Minerals Rule (which includes Regulation S-K, Item 1.01 and Item 1.02).

Sunstone is committed to understanding and addressing the source of minerals used in our products. Sunstone Circuits requires all our 3TG suppliers to report the smelters/refiners in their supply chain for Tin and Gold. Sunstone does not currently produce any product that contains Tungsten or Tantalum.

We request copies of our suppliers' CMRT (Conflict Minerals Reporting Template) on a regular basis to keep our Sunstone CMRT updated. Additionally, we are notified by suppliers when changes to their reporting or policies have been made.

Sunstone Circuits is dedicated to using best practices to ensure that the minerals used in our products are sourced responsibly and ethically.

Sunstone Circuits

A handwritten signature in blue ink, appearing to read "Edward L. ...", is written over a horizontal line.
